DETAILED ACTION

Amendment

1. Receipt is acknowledged of the Request for Continued Examination filed April 28, 2004.

Allowable Subject Matter

2. Claims 1-9 are allowed over prior art.
3. The following is an examiner's statement of reasons for allowance: Although prior art teaches optoelectronic devices for detecting marks having defined contrast patterns and additionally, teaches the light beams transmitted having a wavelength λ in the range of $350 \text{ nm} \leq \lambda \leq 450 \text{ nm}$, the best prior art of record, taken alone or in combination, fails to specifically teach or fairly suggest the arrangement of the optoelectronic device disclosed in the present invention. Specifically, prior art fails to teach a transmission lens downstream of the transmitter; a receiver for receiving received light beams and generating reception signals corresponding to the received light beams; a receiving lens located upstream of the receiver and having an area A_c of less than or equal to 5 cm^2 ; a means for guiding the transmitted light beams at the marks and for guiding reflected light beams from the marks as received light beams to the receiver; and having an evaluation unit coupled to an output of the receiver for evaluating the reception signals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
